

Suzhou Cicor Technology Co. Ltd. – Cicor establishes company in Suzhou, China

Cicor, a leading high-technology industrial group internationally active in the printed circuit boards, microelectronics and electronic solutions markets, has established its own company in Suzhou, China. Its manufacturing plant will offer new production capacities. The new company focuses on full-service solutions in the EMS field and offers a broad manufacturing spectrum in Printed Circuit Boards assembly, system assembly and box building as well as tool manufacturing and plastic injection moulding. Suzhou Cicor Technology Co. Ltd. will act as a hub serving the fast-growing local market.

Mon, 09 May 2011

Cicor's presence in the local market facilitates a targeted market development and thus a rapid expansion of activities in the Chinese market. Cicor possesses immense technological expertise and extensive, highly developed production know-how. This allows it to meet the requirements of numerous fast-growing companies worldwide. In China, for instance, many mid-sized firms have emerged seeking exactly the technical capabilities offered by the Cicor Group.

Cicor CEO Roland Küpfer comments: "Establishing our own facility in China represents yet another significant milestone in our drive to develop Asia's markets and acquire new customers. In particular, our new subsidiary allows us to participate in the dynamic growth of the local market."
