

Press release

Date: 30 January 2018

Swiss foreign trade

2017: Exports at all-time high

Last year, Swiss foreign trade accelerated yet again relative to 2016: exports rose by 4.7% to reach a new record high. Imports grew by 6.9%, posting their strongest growth rate since 2010. Aside from the improved economic situation worldwide, the weakening of the Swiss franc and price trends played a decisive role in both directions of trade. With a surplus of CHF 34.8 billion, the balance of trade closed the year 6% (or CHF 2.1 bn) lower than the previous year.

Highlights

- ▲ Foreign trade continued to gain momentum throughout the year
- ▲ Metals: strongest export growth since 2010
- ▲ New record level for second (North America) and third (Asia) largest markets

¹ years unadjusted

Overall trend

Exports rose by 4.7% (real: +1.7%) to CHF 220 billion in 2017. They thus reached a new high and exceeded the previous year's existing record by CHF 10 billion. **Imports** grew by 6.9% (real: +3.8%) to CHF 186 billion, their second highest figure in history. The trend gained momentum in both directions of trade from quarter to quarter. The final quarter then saw a new quarterly high of CHF 58 billion and CHF 50 billion (adjusted for working days), respectively.

Seasonally adjusted Swiss foreign trade (nominal)

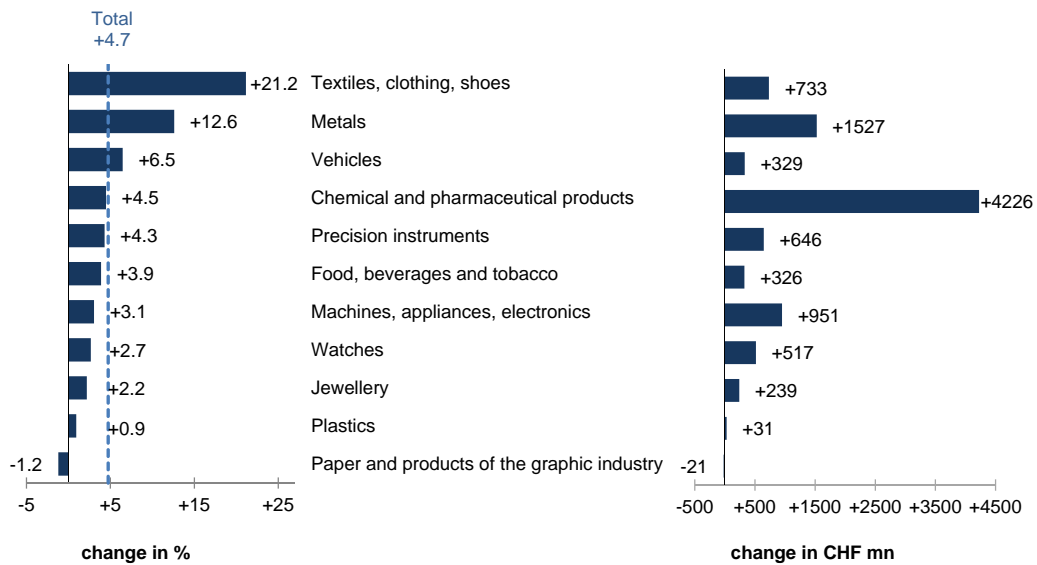

Exports: China replaced the United Kingdom as fifth largest market

Ten of the eleven main groups posted an increase in 2017. Only the sales of **paper and graphic products** fell short of the previous year's result, continuing their longstanding negative trend. The largest branch, **chemical and pharmaceutical products** (+4.2 bn), accounted for 40% of total growth. The substantial rise in **textiles, clothing and shoes** remained due to the phenomenon of returns.

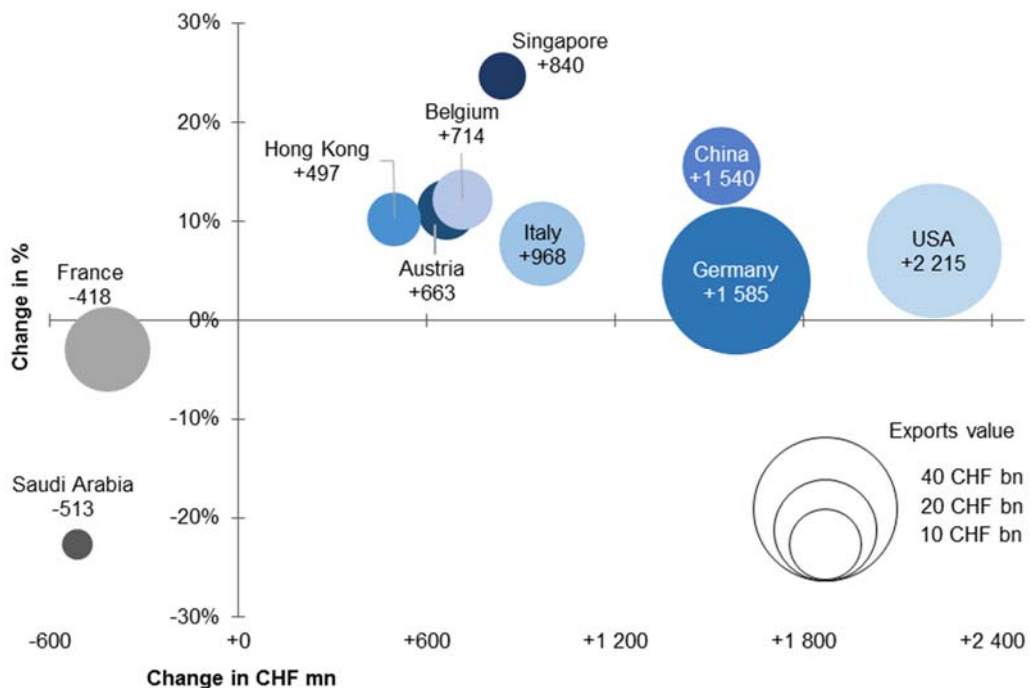

Exports of **metals** rose by 13% and reached their highest level since 2008. In the area of **chemical and pharmaceutical products**, deliveries grew in all branches except agrochemical products. In particular, exports of immunological products were up by 7%. Exports of **machines and electronics** expanded by 3% and are thus likely to have emerged from their trough. Nonetheless, international sales in 2017 were still CHF 12 billion below the record level of 2008. Following declining sales the previous two years, exports of **watches** rose again in 2017 (+3%).

Exports by product group Nominal change relative to 2016

Switzerland's export sector sold more goods in value terms on all continents. The increase was between 4% (Europe) and 7% (North America) in the three main markets. The rise in **North America** stemmed from the 7% increase in shipments to the United States, whereby exports climbed to a new record level of CHF 34 billion. In **Asia** (+6% to CHF 48.1 bn), Singapore (+25%; chemical and pharmaceutical products), China (+16%, or CHF 1.5 bn) and Hong Kong (+10%) stood out. Exports to China have thus doubled since 2008. In contrast, deliveries to the Middle East fell by 9%, especially those to Saudi Arabia. In **Europe**, exports to Belgium (+12%), Austria (+11%) and Italy (+8%) grew at an above-average rate. While exports to Germany rose by 4% (+1.6 bn), exports to France (jewellery) fell by 3% and those to the United Kingdom were down by 1%.

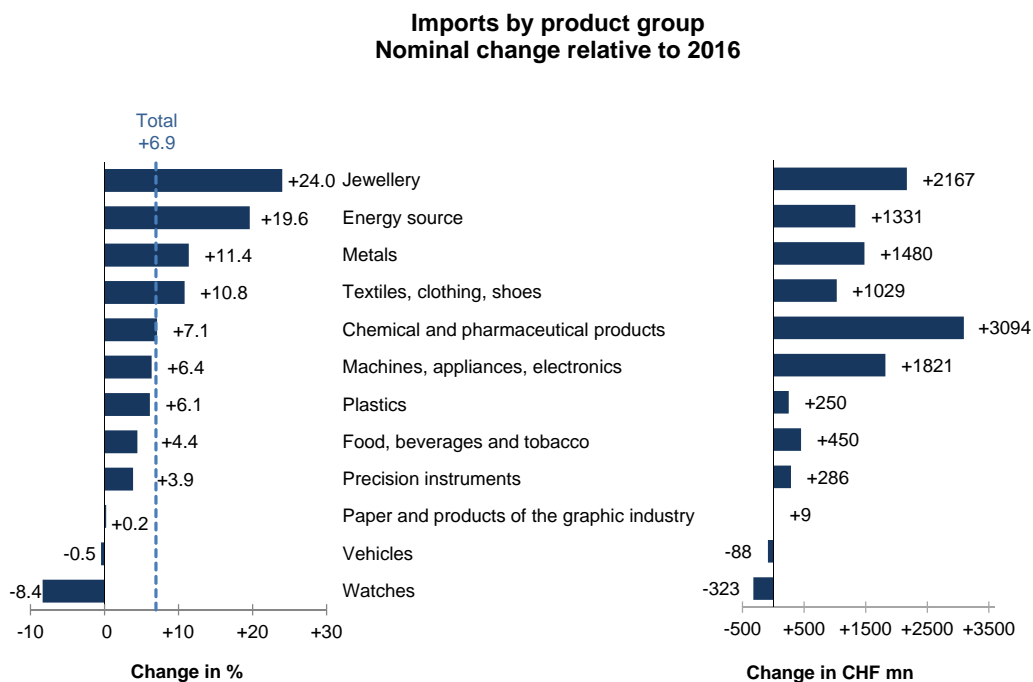

Exports by country Nominal change relative to 2016

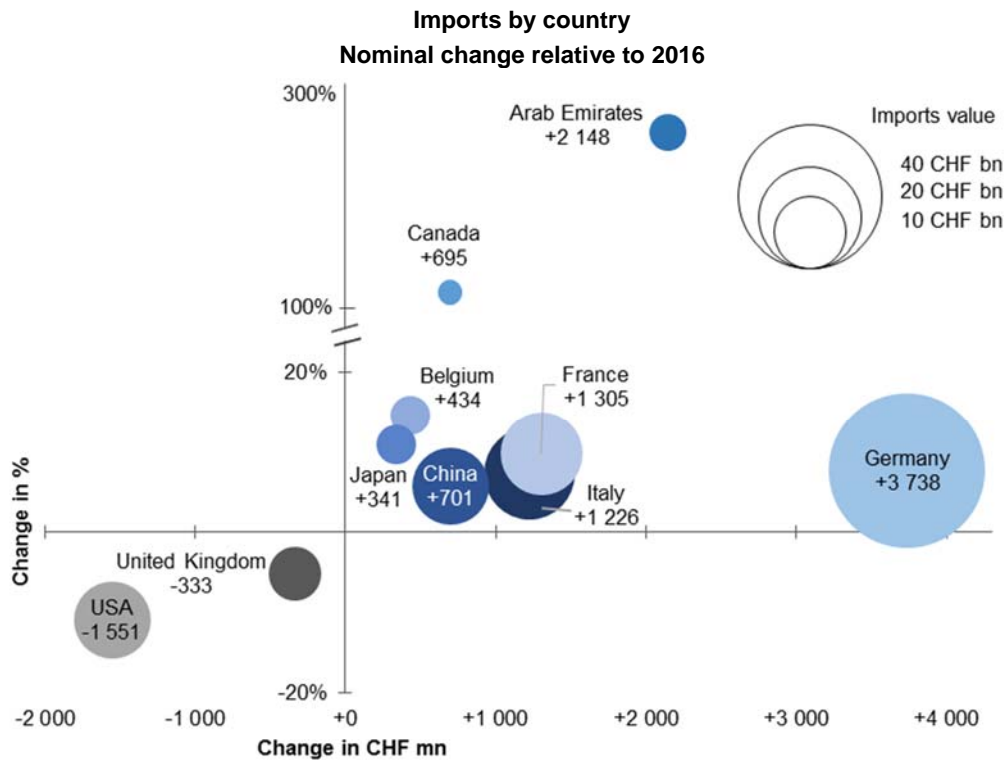

Price increases dominated the trend of imports

Imports grew in seven of the ten largest branches. Half of the product groups recorded additional imports of between CHF 1.0 billion and CHF 3.1 billion. **Jewellery** rose the most (+24%), but **chemical and pharmaceutical products** (+3.1 bn, or +7%) made the largest contribution to the overall increase.

The increase of a fifth in imports of **energy sources** was price driven (real: +0%). Price increases shaped the trend in the **metals** segment too (real: +4%). In the **chemical and pharmaceutical products branch**, imports of medicines grew by CHF 2.7 billion and those of immunological products were up by CHF 1.3 billion. Meanwhile, imports of pharmaceutical active principles fell by the same amount. In the **machines and electronics** sector (+6%), the 23% increase in imports of non-electric engines (e.g. turbines) was striking. The picture was mixed in the **vehicles sector** (-1%), with the rise in imports of passenger cars (+2%) and commercial road vehicles (+8%) being offset by a plunge in aircraft imports (-23%).

Switzerland imported more goods from all continents – except North America – in 2017. Imports from **Asia**, the second largest market for deliveries, grew by a total of 15%, or CHF 4.2 billion. Imports from the Arab Emirates (jewellery; returns) alone contributed CHF 2.1 billion. Meanwhile, imports from Japan rose by 11% and those from China by 6%. In **Europe**, imports from Italy, Germany and France increased by between 7% and 10%, and imports from Belgium rose by 15%. In contrast, imports from the United Kingdom fell by 5% (-333 mn). In **Latin America** (+12%), imports from Mexico rose by a third, or CHF 233 million. In **North America** (-6%), the doubling of imports from Canada was unable to compensate for the decline from the United States. The trend of aircraft imports was the cause in both cases.

December 2017: robust end of year

In December 2017, Swiss foreign trade continued to surge: adjusted for the number of working days, exports grew by 10.8% (real: +4.6%) and imports by 13.5% (real: +11.1%). While the momentum was also reflected in the seasonally adjusted export figures, imports were unable to match the previous month's results. The year ended with a trade surplus of CHF 2.5 billion.

Important information:

Unless otherwise stated, this press release comments on the trend of foreign trade on an unadjusted basis. The text, tables and charts are based on the provisional business cycle data (Total 1), i.e. **without** trading in gold, other precious metals, precious stones and gems, works of art and antiques.

Further foreign trade statistics can be found online in our database: www.swiss-impex.admin.ch.

The press release on Swiss foreign trade for the **January 2018** reporting period is intended for publication on Tuesday, **20 February 2018** ([Release calendar](#)).

Nominal:	At current prices, i.e. not price-adjusted
Real:	Price-adjusted (based on averages)
Unadjusted:	Observed, data collected
Adjusted for working days:	Takes account of the influence of individual working days (e.g. number of Thursdays per month) and other calendar-related effects
Seasonally adjusted:	Adjusted for the number of working days and excluding seasonal fluctuations
Product groups:	Classification according to the " product type " nomenclature
Comparison period:	Working-day adjusted changes are relative to the prior-year period, and seasonally adjusted changes are relative to the previous period
